      Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           DB

-I- FUNCTION: THIS ENZYME CATALYZES THE ENDOHYDROLYSIS OF 1,4-B.
GLUCOSIDIC LINKAGES IN CELLULOSE, LICHENIN AND CEREAL BETA-I
GLUCANS. PRINCIPALLY ACTIVE AGAINST BARLEY BETA-GLUCAN.

-I- CATALYTIC ACTIVITY: Endohydrolysis of 1,4-beta-D-glucosidic
